

FLOWTREND

SMARTER, FASTER FLUID HANDLING SOLUTIONS

LOWTREND
CORPORATION

FLOWTREND

Reliable and efficient, Flowtrend is a leading supplier of cost-effective, high-quality alternative fluid handling products. Our worldwide network of distributors provides end users with fast delivery and prompt service. Our extensive product program with over 17,000 unique items covers a full range of wear parts as well as a variety of pumps, valves and tank equipment for major OEM suppliers.

Flowtrend certifies that all materials and articles intended to come into contact with food meet the requirements established in Regulation [EC] No. 1935/2004 of the European Parliament and of the Council and Commission Regulation [EU] No. 10/2011.

This certification is based on a material quality control program that includes both pedigree documentation traceability to approved materials and random testing of all materials that are processed and packaged by Flowtrend to ensure that they are as specified.

All Flowtrend products are subject to pass our ISO 9001 quality control system and meet the material standards for quality in accordance with regional specifications. We value our customer's needs and guarantee a high-quality product that will ship the same day. And all at the lowest price on the market.

Flowtrend's experienced staff of experts and technicians from the world's leading fluid handling providers will help you find the right product—at the right price.

VALVES

Flowtrend has a diverse line of valves to accommodate a variety of operating conditions found in the sanitary industries. From the Flowtrend ARC-R Seat Valve that is well suited for aseptic conditions and high sterilization temperatures, to the Flowtrend SRC-R available in both divert and shut off with an easily repairable actuator, Flowtrend offers a full line of high quality valves intended to be interchangeable with the OEM products.

SPECIAL REQUESTS

1. TUNGSTEN CARBIDE All seals are offered in TC. We have recently produced TC components for the UI and Votator® SSHE for specialty applications [Peanut Butter].

2. FEP O-RINGS All o-rings [Metric or Standard] are offered in EPDM, Viton®, and Silicone core materials. These O-Rings are Rated at -59.4°C to 204.4°C. Available in 50 or 90 Shore A Hardness. Therefore, all sealing points that rely on o-rings can be converted for Hi-Temp/Harsh applications

3. VALVE ELASTOMERS All valve elastomers are available in a variety of colors and compounds by special order to meet the demands of your customers' process.
