
Polymer (Elastomers, Plastics, and Resins) Certification

Flowtrend, Inc. certifies that the polymers (such as elastomers, plastics, silicon carbide, phenolic resins) used in the manufacturing of our products have been tested to be in compliance with the FDA Code of Federal Regulations Title 21, Part 177 Subpart B (Substances for Use as Basic Components of Single and Repeated Use Food Contact Surfaces).

Flowtrend further certifies that all polymers used in any of our food contact products are phthalate-free and do not come into contact with phthalates during the manufacturing, packaging or inspection processes.

Stainless Steel Certification

Flowtrend, Inc. certifies that our stainless steel products conform to AISI 304, AISI 316, or AISI 316L material in accordance with ASTM A250 and or EN 10088-1 standards. Wave spring materials consist of one of the stainless steel materials above or 17-7 pH hardened stainless steel based on application.

3A Compliance

Polymers that are used in our 3-A certified products meet the additional requirements imposed by 3-A Sanitary Standards as part of the 3-A certification process which involves a third party inspection by a 3-A Certified Conformance Evaluator (CCE). Certificates may be viewed online at www.3-A.org. Note: Flowtrend employees also participate in a 3-A sponsored documents groups.
