

Flowtrend, Inc. is committed to the maintenance of consistently high levels of quality in the design, materials and fabrication of products bearing the 3A symbol. We maintain a documented program to monitor conformance to the criteria of 3A manufactured products. We manufacture equipment to the following standards:

Sanitary Standards 3A, Sanitary Standards for Compression-Type Valves, Number 53-03>, including the following:

- All materials of construction including all plastics, rubbers, adhesives and metal alloys not specifically listed in the standards are verified as in conformance.
- All drawings accurately depict fabrication criteria.
- All machinists, welders, grinders, polishers and other fabrication and installation employees are monitored to assure conformance on a units produced.
- All changes and modifications to the design, materials or fabrication techniques meet or exceed specified criteria and are properly documented.
- We acknowledge that the 3A SSI may share any information of confirmed nonconformance to materially affected parties, including regulatory agencies and individuals in accordance with Section B6.5.11 of the TPV manual

We, the undersigned, do hereby certify and attest that these statements and information provided with this form are true, complete and accurate. We acknowledge that any failure to provide true, complete and accurate information will result in the immediate forfeiture of all 3A symbol authorizations and fees.
